

## S 110

### Screw compressor 11 kW

The power to supply several workstations at the same time, without losing pace.

Supplied without air receiver or dryer, to be connected to your compressed air network.

### Technical specifications

|                     |                                                                      |
|---------------------|----------------------------------------------------------------------|
| Power               | 11 kW                                                                |
| Technology          | Screw compressor, permanent magnet motor, direct drive               |
| Maximum pressure    | 8, 10 or 13 bar, your choice                                         |
| Air flow (ISO 1217) | 1.7 m³/min at 8 bar; 1.4 m³/min at 10 bar; 1.1 m³/min at 13 bar      |
| Air receiver        | No air receiver                                                      |
| Colour              | Blue, black and yellow, or black and red                             |
| Power supply        | 380 V three-phase / 50 Hz                                            |
| Cooling             | Air-cooled                                                           |
| Noise level         | 68 to 72 ± 2 dB(A)                                                   |
| Outlet connection   | G 1/2"                                                               |
| Dimensions          | 1050 × 700 × 1000 mm (L × W × H)                                     |
| Weight              | 210 kg                                                               |
| Service intervals   | 500 hours, then every 1,500 hours (reminder shown by the controller) |
| Oil                 | 10 L, Shell Corena S3 R recommended                                  |
